Windshield Cover Ordering Instructions

Please Print This Page

Please pay close attention to the following instructions. RV manufacturers at times will change windshields and side windows in mid-year and that means we need your help to make sure your windshield cover kit fits correctly. The extra steps take a little more time now but, can save a lot of time later. Use this page as a work sheet.

The following is information we will need when you place an order for your RV Windshield Cover Kit:

Year: _____ (Do not guess at this it's the biggest reason for mistakes. Do not assume another year will fit).

Make: _____

Model: _____

Windshield Wiper Length _____

Color of Windshield Cover _____

Measurements: Please measure from outside of frame or rubber molding.

Windshield Width across bottom _____

Windshield Height in center and either side _____

Passenger side window ALL Sides _____

Driver side window ALL Sides _____

Does your RV have any of the following:

Driver Door: _____

Wide Body: _____

Front Entry Door (Is the main entrance door in front of the passenger seat?) _____

Please make note of anything that might interfere with the installation. (awnings, antennas, auxiliary lights, etc...)

Please choose which fastener you prefer:

Standard Snaps (Require Drilling)(Standard) _____

Twist Locks (Require Drilling, \$20.00 Extra) _____ Twist Locks are the most widely used fastener!

Dual Lock (No Drilling,\$20.00 Extra, from time to time the Dual Lock will need to be replaced on the RV) _____

When measuring the Width go straight across the bottom at the widest point.

The Kit comes with a Windshield Cover, Driver & Passenger Side Cover, Wiper Covers and a Storage Bag.

We can also make Covers for any additional windows upon request. Call us for additional costs.

Please Use Work Sheet on the Back

Dual Lock

Is a very thick, clear plastic that works in the same manner as Velcro. The patented product with 3M adhesive will last a long time.

Twist Locks

Are very popular because of the easy to use twisting method that locks the fabric in place.

Snaps

Are very simple to use and install. Snaps provide a secure fastening method and will work in many applications

Passenger Side

Windshield

Driver Side

Please follow these instructions carefully. We will not accept partial measurements!

- 1) All measurements should be from outside of rubber molding or frame to outside of rubber molding or frame. Do not measure the glass.
- 2) Windshield - Measure the height in the center, on one side, and width across the bottom.
- 3) Passenger Window - Measure ALL of the sides (some have 5 & 6 sides) Keep track of the Top, Bottom, Front etc.... We will not figure out missing measurements!
- 4) Driver Window - Measure ALL of the sides (some have 5 & 6 sides) Keep track of the Top, Bottom, Front etc....We will not figure out missing measurements!

We will need to know if you have an awning, antenna or any other accessory that will interfere with the covers. Do Not Assume that we know what your RV has on it. We will not be held responsible for any adjustments if we are not told about them. If there is something that will interfere we will need to know the measurements to adjust for it. Pictures are very helpful in this area. **Pictures can be Texted to 406-961-8688**
